### NOT ANY KNIFE

When it comes to Swiss Army knives, every Boy Scout wants one, and now, thanks to the Alinghi SUI1, every boater will too. Wenger, maker of the Swiss Army knife, recently released this model, which features a new, integrated receptacle for both Phillips and flat-head screwdriver bits — great for tackling those loose bolts. The Alinghi SUI1 also boasts a one-handed-opening, 4-inch blade with 50 percent serration and a safety lock; shackle opener; marlin spike with needle; ruler; needle-nose pliers with wire cutter; cap lifter; wire stripper; reamer; awl with sewing eye; and texturized rubber inlay on the handle. \$175.
