

Wenger Powers Up New 2012 Solar Charger Line

Salt Lake City, UT – January 19, 2012 - Wenger, Maker of the Genuine Swiss Army Knife, has introduced a complete family of Solar Chargers, ideal for the outdoor enthusiast. The new line includes three models, featuring a standard Solar Charger, Top Solar Charger and Solar Charger Pro. Small enough to pack on any camping trip but large enough to charge phones, tablets, GPS's and more, the new Solar Chargers are almost as versatile and functional as a Wenger Swiss Army Knife.

The new Wenger Solar Chargers utilize sunlight to generate an electric current that ultimately becomes a renewable source of energy, allowing users to prolong their outdoor adventures, while at the same time syncing their social life. Made of robust, flexible and waterproof polycrystalline solar panels, Wenger's Solar Chargers are a smart, portable solution to charge your electronic devices on the go.

A great accessory to Wenger's Camping Gear, these Solar Chargers easily attach to a tent, bike, pack, kayak, car top and almost anything else that one might carry or ride.

Wenger's Solar Chargers are available in three sizes:

- Standard: 2 panels = 2.25 watts
- Top: 4 panels = 4.5 watts
- Pro: 6 panels = 6.75 watts

Each model includes a high capacity lithium battery which accumulates and stores generated power that can be used on-demand for GPS, tablets, smart phones, e-readers, digital cameras and more. The battery features a USB input that's compatible with hundreds of electronic devices and to make life even easier, each Wenger Solar Charger includes a retractable USB connector and 5 adapters.

Additionally, all three models are water-resistant and foldable, and include features like a rear battery pocket and optional LED light.

Standard Solar Charger

The Standard Solar Charger is the smallest model in the portable charger family. It is available in red and has an MSRP of \$180.00.

Features:

- 2 polycrystalline solar panels
- 2.25 Watt power
- 5V Micro USB output
- 2200 mAh battery included, can be recharged by solar panel or USI port
- Battery charging time: approximately 6 hours

Top Solar Charger

The Top Solar Charger is the next largest portable charger in the Wenger line. It has an MSRP of \$270.00 and is available in red.

Features:

- 4 polycrystalline solar panels
- 4.5 Watt power
- 5V Micro USB output
- 5000 mAh battery included, can be recharged by solar panel or USB port
- Battery charging time: approximately 7 hours

Solar Charger Pro

The Solar Charger Pro is the largest portable charger in the Wenger line. It is available in red and has an MSRP of \$340.00.

Features:

- 6 polycrystalline solar panels
- 6.75 Watt power
- 5V Micro USB output
- 5000 mAh battery included, can be recharged by solar panel or USB
- Battery charging time: approximately 5 hours

LED Power Light Accessory

The high-power, high-quality light accessory can be integrated in the back of any of the three solar chargers or used alone when camping, cycling, or other various outdoor activities. When attached to the solar charger the light accessory will be powered from the battery unit integrated in the solar charger. The LED Power Light has an MSRP of \$70.00.

Features:

- 3W LED power
- Osram lenses
- TC (k): 6000-6500
