## Wenger Watches Maker of the Genuine Swiss Army Knife

November 4, 2012

The good folks over at [Wenger](#) sent us over one of their amazing timepieces which we had the chance to check out first hand (no pun intended). The rugged brown leather strap of their [Men's Terragraph](#) (\$225) line is one sophisticated looking band, which holds the simple functionality of the Swiss craftsmanship.

Tracing its bloodline to the classic field watch, the Terragraph series is recognized for its no nonsense great looks. But, expect the unexpected from a Terragraph. Expect to be drawn to its functionality even before you give its handsome, yet unpretentious, styling a first thought.
